Summary

Fullstack Developer with hands-on experience building responsive web applications using modern JavaScript frameworks. Skilled in API integration, TypeScript, and creating user-friendly, mobile-first interfaces. Currently completing the Fullstack Development program at Pinecone Academy, with completed projects highlighting problem-solving, clean code, and scalable design.

Skills

Languages & Frameworks: TypeScript, JavaScript, Node.js, Express.js, Next.js, React
Databases: PostgreSQL, MySQL, MongoDB
Other: REST APIs, JWT Auth, Cloudinary, Git/GitHub, Agile workflow

Projects

Language Learning App for Kids (Team Project)

- Developed an educational platform for early readers, supporting interactive lessons. Integrated **Gemini AI API** for personalized learning, with PostgreSQL database, JWT authentication, full CRUD functionality, and Cloudinary for media management. Designed to make learning engaging and track progress effectively.

Buy Me a Coffee Clone (Team Project)

- Built a full-stack donation platform handling **20+ user accounts** with **React**, **Node.js**, **Express**, and **PostgreSQL**. Implemented **JWT authentication**, hashed passwords, CRUD APIs, and **Cloudinary** for media uploads, enabling secure and smooth user interactions.

Movie Search App

- Next.js app using external APIs to explore **20,000+ movies**. Features search, pagination, dark mode, and detailed movie pages with a smooth, responsive user experience.

Developer Blog Platform

- Built with API integration to serve and manage **1,000+ articles** in real time. Includes light/dark theme switching, pagination for smooth browsing, and detailed article pages for a better reading experience.

Education

Bachelor of Science in Mechanical Engineering MUST, Ulaanbaatar | 2019-2024
